

Overview — Yuktiva AI orchestrates **3–5 specialised AI agents per pipeline** via a Node.js/Express backend, streaming results in real-time over Server-Sent Events (SSE) to a React 18 frontend. All agents run on **Groq (LLaMA 3.3 70B / 3.1 8B)** with smart model routing — large models for complex reasoning, small models for fast transforms — achieving comparable results at ~40% lower cost.

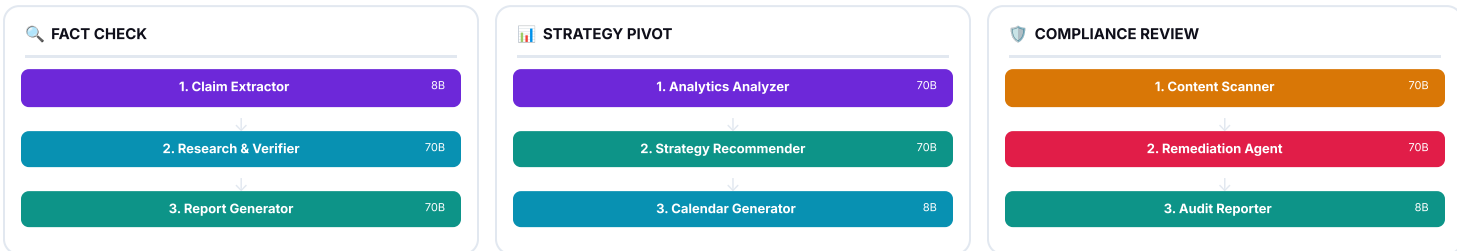

HIGH-LEVEL SYSTEM ARCHITECTURE

PRODUCT LAUNCH PIPELINE — 5 AGENTS (PRIMARY PIPELINE)

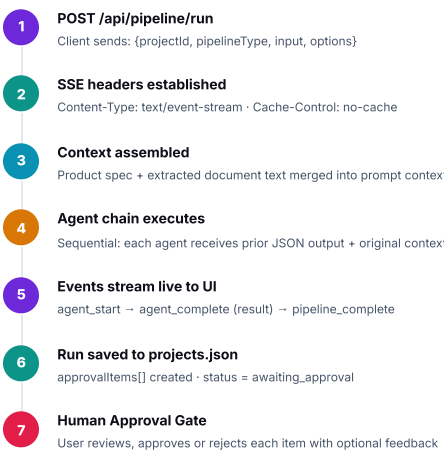

OTHER PIPELINE ARCHITECTURES (3 AGENTS EACH)

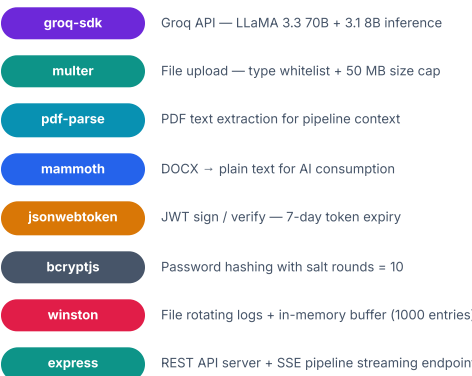

AGENT ROLES & RESPONSIBILITIES

Agent	Pipeline	Input	Output (JSON keys)	Model
Drafter	Product Launch	Spec + brand context	{blogPost, socialVariants, faq, adCopy}	LLaMA 70B
Localizer	Product Launch	Drafter JSON + language	{blogTitle, caption, adHeadline, culturalNotes}	LLaMA 8B
Brand Reviewer	Product Launch	Drafter JSON + guidelines	{score, issues[], strengths[], recommendations[]}	LLaMA 8B
Compliance	Product Launch	Drafter JSON + industry	{violations[], riskLevel, compliantRewrites[]}	LLaMA 70B
Publisher	Product Launch	All 4 prior outputs	{channels[], contentCalendar[], estimatedReach}	LLaMA 8B
Claim Extractor	Fact Check	Raw content text	{claims[], totalClaims}	LLaMA 8B
Research Agent	Fact Check	Claims JSON array	{verifications[], overallCredibility, redFlags[]}	LLaMA 70B
Report Generator	Fact Check	Verifications JSON	{credibilityScore, breakdown, flaggedClaims[]}	LLaMA 70B
Analytics Analyzer	Strategy Pivot	Analytics data + context	{keyInsights[], topPerformers[], trendAnalysis}	LLaMA 70B
Strategy Recommender	Strategy Pivot	Analytics insights JSON	{recommendations[], roadmap[], contentMix}	LLaMA 70B
Calendar Generator	Strategy Pivot	Strategy output JSON	{weeklySchedule[], contentPillars[], reach}	LLaMA 8B
